IASUS Concepts introduces the NT3 EVOLUTION universal throat mic system.

The new NT3 Evolution is the next generation of our industry standard NT2 throat mic headset. IASUS has taken throat mic communication to the next level with extensive research and development to deliver a high performance headset which blocks out even the most extreme background noise environments while improving voice quality.

The new Gen 3.0 transponder is now compatible with applications such as PC, Xbox and Mobile devices. In order to maximize the NT3's full potential, we have incorporated an adaptor/PTT system that allows for different plug configurations to allow for a more diverse range of applications. One can now use the throat mic on the Paintball field with a 2 way radio and on the PC when playing online games with the simple change in configuration.

Aside from the covert style acoustic coil, the NT3 is completely re engineered from the bottom up. An all new improved Gen 3.0 metal transponder with an adjustable flexible throat strap with an innovative breakaway magnetic clasp are just a few new features. Integrated all into a bespoke new design with metal accents, the new NT3 Evolution had evolved from traditional bulky to sleek and stylish.

NEW FEATURES

- Gen 3.0 transponder
- Integrated Acoustic coil
- Adjustable flexible throat strap
- Magnetic safety clasp
- Braided cables
