**IASUS Concepts, Ltd. Launches new versions of the NT2 headsets
May 7, 2006**

In response to feedback from customers, IASUS Concepts now introduces two new additions to the NT2 line.

Firstly, there is now a new large size neckband. The original version of the NT2 fit users best with neck sizes of up to 16". The new version will fit users with necks sizes of up to 19" to 20".

Secondly, the NT2 is now compatible with the Midland GXT line of two-way radios. Now there are NT2's available for Motorola Talkabouts, Cobras (both pin and dual pin models), and Midland GXT radios. All versions are also available in the original and large size neckbands.

Please consult our compatibility tables for further details.
