IASUS Concepts launches the new advanced NT Sniper PRO throat mic headset for professional applications.

The IASUS design and engineering team have taken our innovative industry leading NT Sniper tactical throat mic system to the next level. Incorporating our new GEN 2.0 Transponder with our all new tactical PTT and heavy duty issue throat strap, the NT Sniper Pro spec represents the next level of throat mic technology. With improvements in communication clarity, tactical positioning and comfort, the NT Sniper PRO spec throat mic was designed specifically at the request of our military, SWAT, and ERT customers.

GEN 2.0 Transponder

To address issues with compatibility for the 2 way radio market, IASUS Concepts introduces our GEN 2.0 Transponder with improvements to encompass a broader range of 2 way radios. Previous generation transponder dependency on the quality of the 2 way radio was more prevalent and less accommodating. Our new GEN 2.0 transponder eliminates the need for dual transponders resulting in a 20% lighter headset without compromising performance.

Military Grade Ear Insert

The NT Sniper Pro acoustic coil has also been improved with the addition of an optional military grade ear insert. Designed to maintain a custom shape under the temperature conditions of the inner ear, this earpiece has unparalleled comfort and blocks out ambient noise as well. If paired with a standard earplug in the exposed ear, the background noise level is reduced to an extraordinary low level.

NT Sniper Pro package comes with the new NT Sniper Pro headset, new IASUS PTT, our new full neck neoprene IASUS throat strap, IASUS carrying pouch, 2 ear inserts and all new packaging. Compatible with most professional and recreational 2 way radios. We welcome reseller and distributor enquiries. For further details, please contact corporatesales@iasus-concepts.com. MSRP \$129.00 USD

About IASUS Concepts Ltd:

Founded in 2001, IASUS corporate headquarters is located in Asia with affiliate offices in the United States and United Kingdom. An innovator of industrial design and technology development, IASUS concepts focuses on creating unique innovative products for specialized applications.
