

IASUS Concepts Creates a Sonic Boom for Extreme Sports

January 5, 2007 – **IASUS**-Concepts Ltd., a leader in communications headset devices, today introduces a hi-fidelity headset solution for extreme sport enthusiasts around the globe. The **IASUS XSound 2** provides ultra-high quality acoustics that can be used in any protective headgear.

Our ultra-slim speakers, only half an inch thick, have been developed exclusively by **IASUS** to produce an unbelievable range of treble and bass output. With a full fidelity frequency range of 20Hz-22,000Hz at 108dB/1 KHz, the **XSound 2** defines a new standard for helmet speakers. Previously overlooked, **IASUS** has flawlessly integrated high fidelity sound with extreme sports.

Traditionally, slim speakers have weak bass output due to a lack of space. **IASUS** has overcome the technical challenge of producing full range bass with a compact speaker that pumps out huge sound. The **XSound 2** revolutionizes audio without compromising sound for mobility.

SPECIFICATIONS:

Frequency Range: 20-22,000HZ at 108dB/1 KHz

Max Power: 500mW

Impedance: 60 Ohm
