## Using your X-SOUND

The X-Sound does not require any special installation. Firstly, separate the Velcro pieces and stick the bristle pieces into your helmet, aligning it to ear level. Place the soft padded earphones into the helmet, matching up the Velcro pieces. Next, plug the headphones into your CD/MP3 player. Your X-Sound is now operational. When not using the X-Sound, you can use the extra soft Velcro covers to place over the bristle pieces in order to ensure comfort when not using the X-Sound.

## Use and Care

- It is dangerous to ride a motorcycle or perform sports  without an awareness of the environment. It may also be  illegal in some areas. We only recommend using the X- SOUND under volumes where you can hear   environmental noise.
- Do not operate your CD/MP3 player at high audio   volumes when using the X-SOUND. Hearing experts   advise against the continuous high volume operation. If  you experience ringing in your ears, discontinue using  the X-SOUND.

Congratulations on your purchase of the X-Sound. The X-Sound is the first and only headphone designed to fit comfortably under speakers. The light-weighted, modular design of X-Sound frees users from other clumsy, helmet-mounted devices, which may not only be a nuisance, but a potential danger for the users.

X-Sound has twin-padded fidelity Headphone, which fit comfortably into the space between the helmet and the ear. The earphones also come with a cable that allows the users to connect up to their CD or MP3 players.
