Manufacturer news | World: Launch of the Noise Terminator Sniper

Johnny Wong of [IASUS Concepts](#) has dropped me a line about their new product - a noise free mic/earpiece set for radio communication. For anyone looking for a more affordable and functional tactical mic and earpiece for their radio sets, I think these guys may have the solution for you. Here's the official press release:

"...IASUS Concepts, Ltd. Launches the Noise Terminator Sniper - Providing the First Affordable Handsfree Communications for Tactical Situations -

Sept 5, 2003 - Having revolutionized the cellular phone market with the original Noise Terminator: Zero Background Noise, IASUS Concepts, Ltd now unveils the Noise Terminator Sniper, a headset specifically designed for clear and effective communications under tactical situations..."

"...Like the original Noise Terminator, the Sniper utilizes the same advanced technology platform only previously used by military communications devices. By converting vocal vibrations into audio signals, noise from the ambient environment is eliminated, giving clear, precise sound.

New Features of the Sniper

- *Dual transponders for even better sound quality. The Sniper is so sensitive; it can even pick up a whisper.*
- *Acoustic tube earpiece; a proven military/secret service earpiece*
- *Water resistant PTT button and rugged cables increases the durability.*

The Sniper has been optimized with two key benefits in mind: effective communications under combat scenarios and durability, which are essential factors for users serious about their combat gear and equipment.

Connection is simple. Plug the Sniper into the two-way radio, and slide the accompanying band around the neck. The acoustic coil earphone is then fit in either ear and connection is made. The Noise Terminator is compatible with all popular models of two-way radio.

The MRSP for the Sniper is USD115 and is immediately available. For purchase details, please visit our authorized distributor Clearer Communications at www.clearercom.com

*About IASUS Concepts Ltd:
Founded in 2001, IASUS Concepts Ltd headquarters are located in Asia. An innovator of industrial design and technology development, IASUS concepts focuses on providing a complete solution for R/D and contracting manufacturing management in Asia.*

For more information, please visit www.iasus-concepts.com or www.noiseterminator.com..." ([IASUS Concepts](#))

 Does the \$115 include the radio, or is it jus the headset? If it's without, it's good, if it's with, it's fan-dabby-dozy!!
